Biosynthesis and Degradation

The biosynthetic pathway of new polyamines in *Caldariella acidophila*.
By M. De Rosa, S. De Rosa, A. Gambacorta, M. Cartení-Farina & V. Zappia 1

Accelerated breakdown of reticulocyte protein formed under conditions of amino acid depletion.
By C. S. Chandler & F. J. Ballard 151

Extensive conjugation of dopamine (3,4-dihydroxyphenethylamine) metabolites in cultured human skin fibroblasts and rat hepatoma cells.
By P. A. Crooks, X. O. Breakefield, C. H. Sulens, C. M. Castiglione & J. K. Coward 187

Studies on the assembly of the rat lens capsule. Biosynthesis and partial characterization of the collagenous components.
By J. G. Heathcote, C. H. J. Sear & M. E. Grant 283

Bioenergetics

Cyanide-insensitive oxidation of ascorbate/*NNN'N'*-tetramethyl-*p*-phenylenediamine mixture by mung-bean (*Phaseolus aureus*) mitochondria. An energy-linked function.
By S. B. Wilson 129

Subcellular Structures

A sub-population of rat liver membrane-bound ribosomes that are detached *in vitro* by carcinogens and centrifugation.
By D. N. Palmer, B. R. Rabin & D. J. Williams 9

Properties of the membrane proteins of rat liver lysosomes. The majority of lysosomal membrane proteins are exposed to the cytoplasm.
By D. L. Schneider, J. Burnside, F. R. Gorga & C. J. Nettleton 75

The mitochondrial localization of coproporphyrinogen III oxidase.
By B. Grandchamp, N. Phung & Y. Nordmann 97

PAGE

Subcellular localization of NAD(P)H oxidase(s) in human neutrophilic polymorphonuclear leucocytes.
By D. B. Iverson, P. Wang-Iverson, J. K. Spitznagel & L. R. DeChatelet 175

Cellular Interactions and Control Processes

Phospholipid composition and metabolism in mouse muscular dystrophy.
By C. T. Kwok & L. Austin 15

Calcium-dependent inhibition of protein synthesis in rat parotid gland.
By P. Kanagasuntheram & S. C. Lim 23

Stimulation of proinsulin biosynthesis and insulin release by pyruvate and lactate.
By K. Jain, S. Asina & J. Logothetopoulos 31

Adenosine 3′:5′-cyclic monophosphate production and steroidogenesis by isolated rat adrenal glomerulosa cells. Effects of angiotensin II and [Sar^1,Ala^8]angiotensin II.
By R. F. Bing & D. Schulster 39

Effect of glutamine on the degradation of glutamine synthetase in hepatoma tissue-culture cells.
By R. B. Crook & G. M. Tomkins 47

Inhibition by calcium ions of adenosine cyclic monophosphate formation in sealed pigeon erythrocyte 'ghosts'. A study using the photoprotein obelin.
By A. K. Campbell & R. L. Dormer 53

Functional involvement of carbonic anhydrase in calcium transport of the chick chorioallantoic membrane.
By R. S. Tuan & J. Zrike 67

Inhibition of adenylate cyclase by adenosine analogues in preparations of broken and intact human platelets. Evidence for the unidirectional control of platelet function by cyclic AMP.
By R. J. Haslam, M. M. L. Davidson & J. V. Desjardins 83

PAGE

Plasma clearance of glycoproteins with terminal mannose and *N*-acetylglucosamine by liver non-parenchymal cells. Studies with β-glucuronidase, *N*-acetyl-β-D-glucosaminidase, ribonuclease B and agalacto-orosomucoid.
By P. H. Schlesinger, T. W. Doebber, B. F. Mandell, R. White, C. DeSchryver, J. S. Rodman, M. J. Miller & P. Stahl 103

Regulation of synthesis of guanosine 3′:5′-cyclic monophosphate in neuroblastoma cells.
By T. Bartfai, X. O. Breakefield & P. Greengard 119

The effect of surgical trauma on muscle protein turnover in rats.
By J. L. Hoover-Plow & A. J. Clifford 137

Studies on sex-organ development. Oestrogenic effect on ornithine decarboxylase activity in the differentiating Müllerian ducts and other organs of the chick embryo.
By C. S. Teng & C. T. Teng 143

Membrane proteins in human erythrocytes during cell fusion induced by oleoylglycerol.
By S. J. Quirk, Q. F. Ahkong, G. M. Botham, J. Vos & J. A. Lucy 159

Stimulation of triacylglycerol synthesis in rat adipocytes by plasma very-low-density lipoproteins.
By P. Thomopoulos, M. Berthelier, D. Lagrange, M. J. Chapman & M.-H. Laudat 169

Control of isocitrate lyase synthesis in *Chlorella fusca* var. *vacuolata*. Rate of enzyme synthesis in the presence and absence of acetate measured by [^{35}S]methionine labelling and immunoprecipitation.
By S. M. Dunham & C. F. Thurston 179

α-Aminoisobutyrate transport into cells from R3230AC mammary adenocarcinoma. Evidence for sodium ion-dependent and -independent carrier-mediated entry and effects of diabetes.
By P. J. Hissin & R. Hilf 205

PAGE

The stimulus–secretion coupling of glucose-induced insulin release. Effect of exogenous pyruvate on islet function.
By A. Sener, S. Kawazu, J. C. Hutton, A. C. Boschero, G. Devis, G. Somers, A. Herchuelz & W. J. Malaisse 217

Effect of corticotropin treatment *in vivo* on the synthesis of a specific adrenal cytosolic protein. Characterization by dual-labelling technique and polyacrylamide-gel electrophoresis.
By A. Dazord, D. Gallet & J. M. Saez 233

The fate of ^{14}C in glucose 6-phosphate synthesized from [1-^{14}C]ribose 5-phosphate by enzymes of rat liver.
By J. F. Williams, M. G. Clark & P. F. Blackmore 241

New reaction sequences for the non-oxidative pentose phosphate pathway.
By J. F. Williams, P. F. Blackmore & M. G. Clark 257

Effects of glucagon and N^6,$O^{2'}$-dibutyryladenosine 3′:5′-cyclic monophosphate on calcium transport in isolated rat liver mitochondria.
By B. P. Hughes & G. J. Barritt 295

Inhibition of isoleucyl-transfer ribonucleic acid synthetase in *Echerichia coli* by pseudomonic acid.
By J. Hughes & G. Mellows 305

Stimulation of anterior pituitary prostaglandin E content and somatotropin (growth hormone) synthesis by phospholipase A.
By A. Betteridge & M. Wallis 319

Development

Calcium accumulation during sporulation of *Bacillus megaterium* KM.
By C. Hogarth & D. J. Ellar 197

Metabolism in Whole Organisms

Synthesis of 1α-hydroxy[7-^{3}H]cholecalciferol and its metabolism in the chick.
By S. Edelstein, D. Noff, D. Freeman, M. Sheves & Y. Mazur 111

RAPID PAPERS

PAGE

Biosynthesis and Degradation

The mechanism of haem degradation *in vitro*. Kinetic evidence for the formation of a haem–oxygen complex.
By S. B. Brown & S. E. Thomas 327

PAGE

Cellular Interactions and Control Processes

Evidence for a reciprocal relationship between lipogenesis and ketogenesis in hepatocytes from fed virgin and lactating rats.
By M. Benito & D. H. Williamson 331

PAGE

A possible role for 5-hydroxytryptamine as a mediator for calcitonin actions on the gastrointestinal tract and pancreas in rats.
By A. M. Nakhla & A. Latif 339

Evidence for a role of insulin in the regulation of lipogenesis in lactating rat mammary gland. Measurements of lipogenesis *in vivo* and plasma hormone concentrations in response to starvation and refeeding.
By A. M. Robinson, J. R. Girard & D. H. Williamson 343

PAGE

Control of rat skeletal-muscle phosphorylase phosphatase activity by adrenaline.
By S.-H. Tao, F. L. Huang, A. Lynch & W. H. Glinsmann 347

Development

Evidence for the participation of aspartate aminotransferase in hepatic glucose synthesis in the suckling newborn rat.
By P. Ferré & D. H. Williamson 335

Contents of Volume 176, No. 2

FULL PAPERS

PAGE

Biosynthesis and Degradation

Oxidation of glycine by *Phaseolus* leghaemoglobin with associated catabolic reactions at the haem.
By P. Lehtovaara 351

Bile-pigment formation from different leghaemoglobins. Methine-bridge specificity of coupled oxidation.
By P. Lehtovaara & U. Perttilä 359

Effect of modeccin on the steps of peptide-chain elongation.
By L. Montanaro, S. Sperti, M. Zamboni, M. Denaro, G. Testoni, A. Gasperi-Campani & F. Stirpe 371

Turnover of muscle protein in the fowl (*Gallus domesticus*). Rates of protein synthesis in fast and slow skeletal, cardiac and smooth muscle of the adult fowl.
By G. J. Laurent, M. P. Sparrow, P. C. Bates & D. J. Millward 393

Appendix: An analysis of errors in estimation of the rate of protein synthesis by constant infusion of a labelled amino acid.
By P. J. Garlick 402

Turnover of muscle protein in the fowl. Changes in rates of protein synthesis and breakdown during hypertrophy of the anterior and posterior latissimus dorsi muscles.
By G. J. Laurent, M. P. Sparrow & D. J. Millward 407

Turnover of muscle protein in the fowl. Collagen content and turnover in cardiac and skeletal muscles of the adult fowl and the changes during stretch-induced growth.
By G. J. Laurent, M. P. Sparrow, P. C. Bates & D. J. Millward 419

PAGE

Ovalbumin digestion by human pepsins 1, 3 and 5.
By V. Walker & W. H. Taylor 429

Participation of cysteine and cystine in inactivation of tyrosine aminotransferase in rat liver homogenates.
By W. T. Buckley & L. P. Milligan 449

Studies on the fate of pulmonary surfactant in the lung.
By R. Desai, T. D. Tetley, C. G. Curtis, G. M. Powell & R. J. Richards 455

The hydrolysis of phosphatidylinositol by lysosomal enzymes of rat liver and brain.
By R. F. Irvine, N. Hemington & R. M. C. Dawson 475

Growth and muscle protein turnover in the chick.
By K. Maruyama, M. L. Sunde & R. W. Swick 573

Bioenergetics

The regulation of extramitochondrial free calcium ion concentration by rat liver mitochondria.
By D. G. Nicholls 463

Characterization of an *Escherichia coli* K12 mutant that is sensitive to chlorate when grown aerobically.
By G. Giordano, L. Grillet, R. Rosset, J. H. Dou, E. Azoulay & B. A. Haddock 553

Subcellular Structures

A rapid method for the preparation of relatively pure metabolically competent synaptosomes from rat brain.
By R. F. G. Booth & J. B. Clark 365

PAGE

Effect of various methods of preparation on the apparent protein composition of eukaryotic ribosomes. An essential preliminary to stoicheiometric measurements.
By P. Huvos, S. Fey & P. M. D. Hardwicke 381

The acidic ribosomal phosphoprotein of eukaryotes and its relationship to ribosomal proteins L7 and L12 of *Escherichia coli*.
By D. P. Leader & A. A. Coia 569

Cellular Interactions and Control Processes

Regulation of prostaglandin synthesis and of the selective release of lysosomal hydrolases by mouse peritoneal macrophages.
By R. J. Bonney, P. D. Wightman, P. Davies, S. J. Sadowski, F. A. Kuehl, Jr. & J. L. Humes 433

Systematic variations in the content of the purine nucleotides in the steady-state perfused rat heart. Evidence for the existence of controlled storage and release of adenine nucleotides.
By D. J. Bates, D. Perrett & J. Mowbray 485

Hyperglycaemic activity and metabolic effects of 3-aminopicolinic acid.
By M. J. MacDonald, M.-T. Huang & H. A. Lardy 495

Effects of cholera toxin and guanosine 5′-[$\beta\gamma$-imido]triphosphate on β-adrenergic-receptor affinity.
By J. Fischer & G. W. G. Sharp 505

PAGE

The oestrogen receptor in the rat uterus in relation to intra-uterine devices and the oestrous cycle.
By L. Myatt, G. Chaudhuri, M. G. Elder & L. Lim 523

Interaction of progestins with steroid receptors in human uterus.
By A. Kasid, K. Buckshee, V. Hingorani & K. R. Laumas 531

Calcium-activated hydrolysis of phosphatidyl-*myo*-inositol 4-phosphate and phosphatidyl-*myo*-inositol 4,5-bisphosphate in guinea-pig synaptosomes.
By H. D. Griffin & J. N. Hawthorne 541

Effect of alloxan-diabetes on gluconeogenesis and ureogenesis in isolated rabbit liver cells.
By J. Zaleski & J. Bryła 563

A method for measuring relative changes in guanosine 3′:5′-cyclic monophosphate in mouse neuroblastoma cells on muscarinic cholinergic stimulation.
By P. G. Strange 583

Development

The metabolism of high-molecular-weight ribonucleic acid in hypothalamic and cortical regions of the developing female rat brain.
By C. Hall & L. Lim 511

Metabolism in Whole Organisms

Biliary excretion of cyclohexylphenyl 4-[^{35}S]-sulphate in the guinea pig.
By G. M. Powell, A. H. Olavesen & C. G. Curtis 443

RAPID PAPERS

PAGE

Biosynthesis and Degradation

The effects of food deprivation on protein turnover and nucleic acid concentrations of active and immobilized extensor digitorum longus muscles of the rat.
By D. F. Goldspink 603

Initiation of transcription in normal and phosphorylated rat liver nucleosomes.
By M. G. Ord & L. A. Stocken 615

Subcellular Structures

Proteinase-sensitive release of enzymes from pancreatic microsomal fraction.
By P. D. Pearce, B. K. May & W. H. Elliott 611

PAGE

Cellular Interactions and Control Processes

Malonaldehyde formation in intact platelets is catalysed by thromboxane synthase.
By R. M. McMillan, D. E. MacIntyre, A. Booth & J. L. Gordon 595

Recognition of the beta-subunit of human chorionic gonadotropin and sub-determinants by target tissue receptors.
By S. Ramakrishnan, C. Das & G. P. Talwar 599

Rat adipose-tissue glycerol phosphate acyltransferase can be inactivated by cyclic AMP-dependent protein kinase.
By H. G. Nimmo & B. Houston 607

Opposite effects of starvation on oxidation of [^{14}C]adenosine and adenosine-induced insulin release by isolated mouse pancreatic islets.
By A. Andersson 619

The role of phosphoenolpyruvate carboxykinase in amino acid metabolism in muscle.
By E. A. Newsholme & T. Williams 623

Activation of pyruvate dehydrogenase in the perfused rat liver by vasopressin.
By D. A. Hems, J. G. McCormack & R. M. Denton 627

Control of phosphatidylcholine synthesis and the regulatory role of choline kinase in rat liver. Evidence from essential-fatty acid-deficient rats.
By J. P. Infante & J. E. Kinsella 631

Utilization of D-3-hydroxy[3-^{14}C]butyrate for lipogenesis *in vivo* in lactating rat mammary gland.
By A. M. Robinson & D. H. Williamson 635

Metabolism in Whole Organisms

An improved 11α-hydroxylation of progesterone by *Aspergillus ochraceus* TS.
By T. B. Samanta, N. Roy & S. Chattopadhyay 593

Contents of Volume 176, No. 3

FULL PAPERS

PAGE

Biosynthesis and Degradation

Growth and metabolism of fucosylated plasma-membrane glycoproteins in mouse neuroblastoma N2a cells.
By A. G. Milenkovic, M. Rachmeler & T. C. Johnson 695

The use of rat liver nucleoplasm for the characterization of heterogeneous nuclear ribonucleic acid synthesis *in vitro*.
By T. J. C. Beebee 715

Sources of ammonia for mammalian urea synthesis.
By H. A. Krebs, R. Hems, P. Lund, D. Halliday & W. W. C. Read 733

Utilization of methylmalonate for the synthesis of branched-chain fatty acids by preparations of chicken liver and sheep adipose tissue.
By J. R. Scaife, K. W. J. Wahle & G. A. Garton 799

Studies of a factor from dystrophic mouse muscle inhibitory towards protein synthesis.
By R. A. Petryshyn & D. M. Nicholls 907

Choice of precursors for the measurement of protein turnover by the double-isotope method. Application to the study of mitochondrial proteins.
By R. J. Burgess, J. H. Walker & R. J. Mayer 919

Relative rates of turnover of subunits of mitochondrial proteins.
By J. H. Walker, R. J. Burgess & R. J. Mayer 927

PAGE

Acetoacetate metabolism in rat brain. Development of acetoacetyl-coenzyme A deacylase and 3-hydroxy-3-methylglutaryl-coenzyme A synthase.
By T. B. Patel & J. B. Clark 951

Lipid-linked oligosaccharides containing glucose in lactating rabbit mammary gland.
By B. K. Speake & D. A. White 993

Bioenergetics

Inhibition of bacterial transport by uncouplers of oxidative phosphorylation. Effects of pentachlorophenol and analogues in *Bacillus subtilis*.
By R. A. Nicholas & G. W. Ordal 639

The reduction of diamide by rat liver mitochondria and the role of glutathione.
By P. C. Jocelyn 649

Photosensitivity of respiration in *Neurospora* mitochondria. A protective role for carotenoid.
By Z. Ramadan-Talib & J. Prebble 767

Characteristics of the transport of alanine, serine and glutamine across the plasma membrane of isolated rat liver cells.
By S. K. Joseph, N. M. Bradford & J. D. McGivan 827

A thermodynamic analysis of the interaction between the mitochondrial coupling adenosine triphosphatase and its naturally occurring inhibitor protein.
By J. C. Gomez-Fernandez & D. A. Harris 967

PAGE

Anion/calcium ion ratios and proton production in some mitochondrial calcium ion uptakes.
By E. J. Harris 983

Cellular Interactions and Control Processes

Enhancement by double-stranded polyribonucleotides of production by cultured mouse peritoneal macrophages of differentiation-stimulating factor(s) for mouse myeloid leukaemic cells.
By M. Tomida, K. Takenaga, Y. Yamamoto & M. Hozumi 665

Endocytosis of sulphated proteoglycans by cultured skin fibroblasts.
By R. Prinz, J. Schwermann, E. Buddecke & K. von Figura 671

Variation in tissue carnitine concentrations with age and sex in the rat.
By P. R. Borum 677

Stable enhancement of calcium retention in mitochondria isolated from rat liver after the administration of glucagon to the intact animal.
By V. Prpić, T. L. Spencer & F. L. Bygrave 705

Calcium-dependent protein modulator of cyclic nucleotide phosphodiesterases from mouse epidermis.
By A. W. Murray & A. Rogers 727

Effects of polyamines on prostatic chromatin- and non-histone-protein-associated protein kinase reactions.
By K. Ahmed, M. J. Wilson, S. A. Goueli & H. G. Williams-Ashman 739

The development of ketogenesis at birth in the rat.
By P. Ferré, J.-P. Pégorier, D. H. Williamson & J. R. Girard 759

The effects of cortisol, corticotropin and thyroxine on the synthesis of glycerolipids and on the phosphatidate phosphohydrolase activity in rat liver.
By H. P. Glenny & D. N. Brindley 777

Control of gluconeogenesis and of enzymes of glycogen metabolism in isolated rat hepatocytes. A parallel study of the effect of phenylephrine and of glucagon.
By L. Hue, J. E. Felíu & H.-G. Hers 791

PAGE

Responsiveness to glucagon by isolated rat hepatocytes controlled by the redox state of the cytosolic nicotinamide–adenine dinucleotide couple acting on adenosine 3′:5′-cyclic monophosphate phosphodiesterase.
By M. G. Clark & I. G. Jarrett 805

Differential effects of tryptophan on glucose synthesis in rats and guinea pigs.
By S. A. Smith, K. R. F. Elliott & C. I. Pogson 817

The effects of ammonium chloride and bicarbonate on the activity of glutaminase in isolated liver mitochondria.
By S. K. Joseph & J. D. McGivan 837

A chemical-modification approach to the olfactory code. Studies with a thiol-specific reagent.
By A. Menevse, G. Dodd & T. M. Poynder 845

Control of amylase biosynthesis and release in the parotid gland of the rat.
By M. A. McPherson & C. N. Hales 855

Post-translational regulation of lipoprotein lipase activity in adipose tissue.
By P. Ashby, D. P. Bennett, I. M. Spencer & D. S. Robinson 865

Mechanisms for the effects of ethanol on hepatic phosphatidate phosphohydrolase.
By M. J. Savolainen & I. E. Hassinen 885

Stimulation by vasopressin, angiotensin and oxytocin of gluconeogenesis in hepatocyte suspensions.
By P. D. Whitton, L. M. Rodrigues & D. A. Hems 893

Calcium ions and the regulation of NAD^+-linked isocitrate dehydrogenase from the mitochondria of rat heart and other tissues.
By R. M. Denton, D. A. Richards & J. G. Chin 899

Onset of ribosome degradation during cessation of growth in BHK-21/C13 cells.
By W. T. Melvin & H. M. Keir 933

An alternative hypothesis of cellular transport of lysosomal enzymes in fibroblasts. Effect of inhibitors of lysosomal enzyme endocytosis on intra- and extra-cellular lysosomal enzyme activities.
By K. von Figura & E. Weber 943

Metabolism of inorganic sulphate in the isolated perfused rat liver. Effect of sulphate concentration on the rate of sulphation by phenol sulphotransferase.
By G. J. Mulder & K. Keulemans 959

PAGE

Conversion between renin and high-molecular-weight renin in the dog.
By S. Funakawa, Y. Funae & K. Yamamoto 977

Development

Age-related changes in the composition and structure of human articular-cartilage proteoglycans.
By M. T. Bayliss & S. Y. Ali 683

Turnover of liver glycogen in the rat foetus.
By M. Gilbert & J. Bourbon 785

PAGE

The binding of ^{3}H-labelled oestradiol– and progesterone–receptor complexes to hypothalamic chromatin of male and female sheep.
By B. N. Perry & A. Lopez 873

Metabolism in Whole Organisms

Microbial metabolism of amino alcohols. Formation of coenzyme B_{12}-dependent ethanolamine ammonia-lyase and its concerted induction in *Escherichia coli*.
By C. M. Blackwell & J. M. Turner 751

RAPID PAPERS

PAGE

Subcellular Structures

Isolation of a high-molecular-weight high-mobility-group-type non-histone protein from hen oviduct.
By C. S. Teng, K. Gallagher & C. T. Teng 1003

PAGE

Cellular Interactions and Control Processes

Thyroid-hormone modulation of the number of β-adrenergic receptors in rat fat-cell membranes.
By Y. Giudicelli 1007

The influence of respiratory state on monoamine oxidase activity in rat liver mitochondria.
By G. S. Smith & R. A. Reid 1011
